

Marine Products Y-Q Adapter

Safely powers a 50A, 125/250V boat from two 30A, 125V receptacles at dockside.

Internal P.C. Board Senses that:

- Both plugs are fully engaged (i.e., one is not dangling loose while the other is plugged in)
- The polarity of the 30A receptacle on the dock is correct (i.e., no mis-wiring of the hot and neutral wires)
- The two 30A receptacles are from opposite phases (i.e., there is a true 250V available instead of just 125V)

PowerCord PLUS™ Cordset 30 Amp, 125 Volt

The new PowerCord PLUS™ Cordset has weather-resistant molded contour grips on both the plug and connector ends that conform to the shape of your hand. This ergonomic feature provides a firm, reliable grip that makes it easy to find the ground blade location when making electrical connections. Additionally, the LED power indicator light adds safety and convenience by glowing red to give immediate indication that electricity is flowing. These features provide an easier, safer way to hook up shore power.
