

TACO Accessory-Ready™ Anodized Aluminum T-Top

This T-top assembles and installs without welding. The Neptune T-top's pre-welded components are engineered to offer the same strength and durability as factory-installed tops. Its modular design allows for overall width and depth adjustments as needed to fit a boat's console up to 41".

The top's outer ring features TACO's Accessory Ready adapters for easy installation & adjustment of rod holders and accessories. With this unique technology, the angle and positioning of rod holders and other accessories can be adjusted with a standard Allen wrench. All T-tops come standard with TACO's patented Outrigger Ready plates allowing for easy installation of TACO's Grand Slam Outrigger Mounts.
