

Deluxe Universal Masthead Mount

Perfect for mounting your Windex or Telo wind direction indicators away from other hardware at the masthead, or for better visibility from the deck. The 13" aluminum boom provides plenty of clearance away from VHF antennas, mast-head lights, wind velocity sensors, etc. The Universal Masthead Mount will attach to virtually any vertical, horizontal, curved, or flat surface. It is adjustable so that the boom remains level even if the mounting surface is inclined up to +20°. Comes with all necessary hardware and complete mounting instructions. Standard boom provides a maximum of 12" of extension, and may be cut to a shorter length if desired.

Overall Length: 13" (33cm).

Weight: 3.2 oz (90g).

**Bird-Proof 15" Windex
Vane Wind Indicator**

Super-sensitive to slight changes in air flow at the masthead. They feature sapphire jewel suspension bearings, large fin / low inertia vanes and easy-to-read, fully adjustable tacking-tab systems for quick reference. A stainless steel spike prevents birds from landing on vane. For cruising and racing boats 15' or longer.
