RACOR 10 Micron Spin-on Fuel Filter Water Separator for Gasoline Marine Engines

Introducing the marine fuel filter/water separator for all inboard, outboard, two and four cycle gasoline engine applications. The **PFF5510** has specially treated 10 micron rated media, guaranteed to outperform standard gas filters. The **PFF5510** gasoline fuel/water separator replaces standard filters in all of the most popular marine gasoline engine applications. Applications include Mercury, Mercruiser, Yamaha, Suzuki, Honda, and Tohatsu powered vessels. The **PFF5510** gasoline fuel/filter separator media was laboratory tested by Racor to Society of Automotive inside and out with highly corrosion resistant coatings to eliminate rust-through.

Features and Benefits

- **Racor** certified manufacturing practices insures superior construction and performance quality.
- Filter media researched and specified by **Racor** filtration experts means better engine protection compared to other low cost fuel filter brands.
- High contaminant capacity and 96% @ 10 micron particle removal efficiency makes this filter suitable for all low or high pressure injection systems.
- 99% efficient water removing filter media.
- Performance exceeds OEM specifications.
- 11/16" -16" threads for the most popular applications.
