

## Modular Manifold

Sea Tech's new modular manifold reduces cost and increases performance.

- Manifold sections are available sold individually.
- Connect directly to the manifold and fixture and eliminate all fittings in between.
- Manifolds increase water flow and reduce pressure loss.
- Individual shut-off valves allow for the user to turn a problem area off without shutting down the entire water system.
- Complies with NSF and FDA standards. All Inlets are 1" CTS (use a Reducing Stem to create other inlet sizes)
