

Piranha Series Straight Port Aerator Pump 600 GPH

Smart. Reliable. Attractive. Efficient. Everything you are looking for in a aerator pump. Our tough, high density nylon housing and heavy duty water cooled motor gives the SHURflo aerator Pump unparalleled reliability. Patented anti-airlock feature allows the pump to clear trapped air in rough water or when the boat is anchored. All Piranha™ Series Aerator Pumps have a removable cartridge for easy cleaning. Includes a 6' wire assembly. Port size 3/4" inlet & outlet. 600 GPH, 1.8 amps.

10 Amp Automatic Aerator Control

This Automatic Aerator Control provides a source of oxygen-rich water to your live well automatically. This unit features a solid-state timer with adjustable off times to adjust to varying conditions. Easily adaptable to existing systems. Requires a 3" diameter round hole or a 2-1/2" square hole for mounting. Simply connect wiring according to instructions provided. Front panel is 3-1/4" x 3-1/4" and requires only 3" behind panel. This is the only timer on the market that will handle a high capacity pumps current draw. Fully potted to be waterproof.

Pro-Air System

For 12 Volt DC Applications. The Pro-Air System air pump has advanced design features that are engineered under rigid quality control conditions to insure long lasting dependable oxygen-rich air source by your livewell or baitwell. The Pro-Air System is capable of aerating both front and rear livewells at the same time. The pump is constructed with a rubber base for quiet operation. The Pro-Air System air stone mounts, which are included, provide a trouble free installation in livewells so that there are no loose or floating parts inside with fish. The air stone provides small air bubbles that are most efficient for leaching oxygen into water. The Pro-Air System comes complete with pump, two air stone mounts, two air stones, an attractive switch-panel with switch for controlling pump, and 20 feet of air line tubing.

Dual-Outlet Tsunami Aerator

GET TWICE THE VALUE

The dual-outlet Tsunami aerator is the most versatile pump on the market! And you can select either a 3-1/2" or a 3/4" inlet length. The Tsunami second outlet is integrated into the pressure chamber, so it looks and works like part of the pump. It has a water-cooled motor inside a tough housing made of engineered alloy resin that resists impact, UV, chemicals and the plasticizers used in most hoses. The patented stainless steel reinforced motor shaft seal ensures perfect alignment and sealing.
